ON-BOARD WEIGHING SYSTEM

Accurate, dynamic weighing, for the latest on-board applications

Red Forge Welvaarts Class III systems are approved for legal-for-trade pay by weight refuse and recycling operations, ideally suited where accurate weight information can be used to perform profitability analysis. These systems can be installed to bin lifters on any side of the vehicle, skip loaders, hook and cable lifts, cranes and many more. Options are available to cover all needs in RFID bin tagging and GPS positional recording. Red Forge Welvaarts systems are installed by Red Forge's own team of fully qualified industry experienced engineers to the highest standards of engineering.

KEY FEATURES AND BENEFITS

Problems caused by overloading...

- European and UK weights and measures approved.
- Full body weighing version can incorporate axle load indication.
- Unrivalled price/performance package.
- Accurate to typically better than 1kg in 500kg on gradients up to 1 in 20°.
- No interruption to the normal collection cycle.
- User friendly operation with full graphical style display.
- Delta display ergonomics developed using full customer feedback and trials.
- Durable high accuracy IP67/68 load cells.
- Instant data download to standard PC software via data-card or remotely via GPRS (data card however must be retained to comply with weights and measures)
- Includes 12 month warranty on-site on all parts and labour.

*depends upon accuracy required for the application.
